

Dear **Dynafoam**[®] customer,

Dynafoam Polyurethane Foam is a mono-component foam-in-place gasketing and cushioning material. It provides excellent thixotropic behavior, allowing 3-dimensional and upside-down applications. The desired gasket height can be achieved with or without a groove, allowing the maximum design flexibility for engineers and creates efficient water seals with only 30% compression.

Its unique formulation includes diisocyanates and to support the protection of you and your teams, we offer free training about the safe use and handling of diisocyanates.

1. Please visit www.safeusediisocyanates.eu or scan the QR code:

2. Go to “List of Trainings” and select the language of the course (see language selection at the top right).
3. Select the training course that you want to follow.
4. Fill in the required fields. A valid email address is required.
5. Just before the payment page, you have the option to enter a voucher code (see coupon field). With code **StGob-DIcode**, **Saint-Gobain**[®] Tape Solutions offers free trainings for our customers, including the following: T045 – T042 – T048 – T049 – T050 – T051 – T052 – T053 – T054. (These can also be searched for in the search bar).
6. After entering the code, the amount to pay for the training should be reduced to 0€.

We hope you enjoy this service and the trainings offered by **Saint-Gobain** Tape Solutions to achieve optimal results with **Dynafoam** Polyurethane Foam and its safe use and handling. For further questions, please contact us, we are happy to help.

Best regards,

Your **Saint-Gobain** Tape Solutions Team
